

Understanding Your Blood Test Results

Patient Name: John Doe
Date of Test: July 10, 2026

You recently had a Complete Blood Count (CBC). Below is a simplified guide.

Your Blood Test Results

Your blood contains several components:

White Blood Cell (WBC): $12.4 \times 10^3/\mu\text{L}$ (High) - Indicates infection or inflammation.

Red Blood Cell (RBC): $3.8 \times 10^6/\mu\text{L}$ (Low) - Indicates anemia.

Hemoglobin (Hgb): 11.2 g/dL (Low) - Low oxygen carrying capacity.
